

MICROSOS™

Developed exclusively by Peoplesafe, the MicroSOS is one of the World's smallest and lightest personal safety devices that is fully certified to BS 8484:2016, Secured by Design and IP67 rated.

The MicroSOS device links directly to Peoplesafe's Alarm Receiving Centre, at the touch of a button. The MicroSOS Fall Detection variant also features a fall detection sensor which will automatically raise the alarm if the user has a slip, trip or fall, making it the perfect solution for ultimate peace-of-mind. Plus the MicroSOS device is IP67 rated, which means it's fully protected against dust, and is waterproof.

The MicroSOS has been designed to be worn in a number of different ways for convenience and discreetness. It also comes with a magnetic docking station allowing it to be easily charged.

ID Badge Holder

Lanyard

Key Ring

Clip or Loop Belt Holster

This device is suitable for the following types of role:

Fixed Site

Mobile

Public Facing

Front View

Side view
