

# HSE WORKPLACE FATALITY FIGURES 2023/24

The Health & Safety Executive's (HSE) annual workplace fatalities statistics for 2023/24

# 1388 workers killed

(RIDDOR 2023/24)

**15** A increase of 15 compared to 2021/22

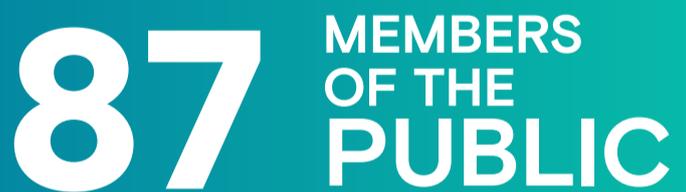

## CAUSES OF FATAL INJURIES:

## FATAL INJURIES BY INDUSTRY:

The risks to older workers (aged 60 or over) continues to be highlighted with 45 of the total fatal injuries, despite only making up around 11% of the workforce.

KILLED DUE TO WORK-RELATED ACTIVITIES

\*Excludes deaths due to work-related accidents to 'patients and service users' in the healthcare and adult social care sectors in England reportable under RIDDOR

"The rise in work-related fatalities, as reported by the Health and Safety Executive, serves as a stark reminder that we cannot become complacent about the health and safety of workers. Put simply, the consequences of poor health and safety are too great a price to pay."

Dr Julie Riggs, Director of Education and Membership, British Safety Council
