

PEOPLESAFE

MySOS ID Badge

Lone Worker GPS Device

Peoplesafe offer a choice of small, discreet and lightweight personal safety devices that can be worn on a lanyard or attached to a belt.

Incorporating the very latest GPRS and GSM communication technologies our BS8484 compliant devices offer built-in Pre-activation and 'Fall Detection' features with two way audio as standard.

Using a combination of both GPS and GNSS receivers, Peoplesafe devices deliver faster performance with greater location accuracy and stability.

MySOS ID badge

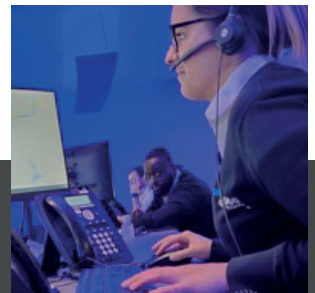

Dimensions: 95mm x 64mm x 11mm

GENERAL	Five function keys TCP/IP and UDP/IP protocols Operating temperature 0° up to 50°C Micro USB connector Loudspeaker

FEATURES

- ▶ BS8484: 2011 accreditation.
- ▶ Multi-network SIM - connects to the mobile phone network with the strongest signal. Enabled/disabled without device swaps.
- ▶ Pre-Activation message facility enables user to record exact address details at our ARC
- ▶ Tilt sensor for fall detection. Configured remotely, audible warning reduces the occurrence of false alarms.
- ▶ One to two-way audio call conversion. ARC only convert call to two-way when safe to do so.
- ▶ Vibrate function - device vibrates discreetly to confirm SOS alarm signal has been received.
- ▶ All calls recorded and stored at the ARC in accordance with ISO27001.
- ▶ Real-time tracking capability.

About us

With over 20 years' experience, our state-of-the-art technology, pioneering systems and innovative products have helped to shape the lone working industry. Key members of our senior leadership team have been with us for over 10 years, providing valuable expertise and driving quality service improvements.

Our service structure sets us apart in the market. Having our whole team under one roof improves communication and ensures we provide a quicker, more reliable response to customers when it's needed most.

We are a principal member of the British Security Industry Association (BSIA) and a national committee member of the British Standards Institution (BSI) contributing to the development and revision of the BS 8484 standard.

Peoplesafe is also a member of the BSIA Lone Worker Section Committee for which our CEO, Naz Dossa, is Chairman.
