MICROSOS

Our smallest and lightest device is designed to look like a USB stick to discreetly protect lone and hybrid workers

Waterproof and Durable

IP67-rated, waterproof durable casing provides protection against dust, rain, splashing and accidental submersion for 30 minutes in up to 1 metre of water.

Customisable call button

Can be configured to include features such as log activity, voice memo or test line functions to best suit your working needs.

Long lasting battery

Up to 5 working days from a single charge with an LED light to indicate low battery.

Two-way audio

High quality voice communication between the user and the ARC Controller when the alarm is raised.

"I had to use my SOS button and the service I received was fantastic. They stayed on the line, talking me through what had happened to make sure I was safe, and offered to ring my line manager to make them aware of the situation too."

MicroSOS user, The Calico Group

FEATURES

- **Audio evidence-** Each alarm is recorded and timestamped for evidential purposes

- **Position reporting-** Pinpoint a user to within 5m² in an emergency
