

MYSOS ID BADGE 4G

A dedicated SOS safety device that hides in plain sight

The MySOS ID Badge is Peoplesafe's most discreet device, ready to protect vulnerable workers without raising any suspicion. Up to 11 working days of usage from a single charge, the device uses both GPS and Wi-Fi location technology to accurately pinpoint the user's location in an emergency.

Discreet design

Quickly and easily activate an alarm without raising suspicion.

GPS & Wi-Fi location

Accurately pinpoint the user's location indoors or outdoors in an emergency using GPS and Wi-Fi signals.

Ripcord alarm activation

An alarm is automatically raised when the lanyard is suddenly pulled and detaches from the device.

Battery performance

Up to 90 hours use from a single charge, equivalent to 11 working days of usage.

LED screen

Easily view remaining battery, GPS signal, 4G network, mobile signal strength, current time, GPRS connection and IMEI number.

Pre-warning alarms

Reduce false alarms with pre-warning alarm notifications for fall detection and ripcord activations.

"Peoplesafe's MySOS device gives our staff discreet protection, it allows for our staff to be able to raise an alarm without being seen by patients"

- Central and North West London NHS Foundation Trust

FEATURES

- **4G connectivity** - Fast connection to our dedicated ARC on a network that is designed for the future.
- **Roaming SIM** - Raise an alarm on the strongest network wherever you are.
- **Timed Activity** - Set a timed alarm at the start of an appointment or activity that will automatically alert our ARC when it expires.
- **Audio evidence** - Alarm audio is automatically recorded and can be used as evidence in court.
- **Dual-functional call button** - Choose which extra features your team will need, from Voice Memos, Time Activities and Check In/Out.
- **Magnetic charging pins** - Easy-to-use magnetic cable charger simply clicks and charges with no more cables to plug in.
- **BS8484 accredited** - Get emergency help faster than 999, as our accreditation enables us to contact police directly.
